WHOLESALE PRICE LIST

Portland Wholesale Nursery Co.

OFFICE • WAREHOUSE AND SALESYARD
5050 S. E. STARK • BELMONT 5-3113
PORTLAND 15, OREGON

To Our Patrons

THIS is strictly a **WHOLESALE** list, and intended only for those engaged in buying and selling nursery products. We will appreciate being notified in case it gets in the hands of anyone not entitled to it.

PRICES are based upon present market conditions, and are subject to change at any time.

RATES for quantity are as follows:

Deciduous Stock (put up in bundles of 10):

Schedule applies for each variety and grade.

1 to 4 at 10 rate plus 20%

5 to 9 at 10 rate plus 10%

10 to 40 at 10 rate

50 or more at 100 rate

Evergreens and other B&B items:

Schedule applies for each variety and grade.

1 to 4 at 10 rate plus 10%

5 to 24 at 10 rate

25 or more at 100 rate

TERMS. 60 days net on all nursery stock. Nursery supplies 30 days net. Interest at 6% will be charged on over-due accounts.

GRADE STANDARDS. Those adopted by the American Association of Nurserymen.

PACKING. All boxing and baling charged at cost.

GUARANTEE OF GENUINENESS. We are ready at any time to replace free of charge, nursery stock that is proven to be untrue to name, or to refund the original amount paid, but we shall in no case be liable for any sum greater than the original purchase price of such stock.

CLAIMS OR COMPLAINTS. We very much appreciate having reports on shipments as soon as they are received. If stock is unsatisfactory, kindly advise us at once, and we will do all in our power to make any necessary adjustment. Unless otherwise specified, our sales are made F.O.B. Portland, and although we use all possible precaution in making shipments, our responsibility ceases upon delivery in good order to the carrier company.

FILLING OF ORDERS. Our central location and the fact that we receive stock from a number of local nurseries enables us to fill orders quite promptly.

LOCATION and INFORMATION

Our office, warehouse and salesyard are located at 5050 S. E. Stark Street. If you have no transportation, phone us, or, if driving, come straight out Stark Street to 50th.

Phone: BElmont 5-3113 and ask for:

One-tier, or Light two-tier	2.75

Prices listed apply only if 5 or more of a variety and grade are ordered.

The following is a descriptive list of newer fruit varieties now being offered.

APPLE

Beacon — New, hardy variety, medium size, ripening with or shortly after Gravenstein. Skin dark red, striped. Flesh moderately firm, juicy, moderately tart to mildly sweet. Rated good for pie and sauce.

Galer — Introduced in 1950, medium size, appears intermediate between Red Delicious and Spitzenburg in shape. Skin is thin, tough and smooth, light yellow, washed and striped with red. A good keeper in common storage, holding well until January or February. Good home variety for cooking purposes.

Melrose — A cross of Jonathan and Delicious, fruit is medium to large, somewhat like Jonathan in shape. Harvest season 7 to 14 days later than Jonathan. Skin is thick, tough, bright red washed and striped color. Flesh firm crisp. Exceptional storage qualities, keeping until May under proper cold storage conditions. Rated good dessert and processing.

Melba — Medium size, uniform shape, skin yellow, crimson striped. Flesh mildly subacid to tart, firm, crisp, juicy. Fruit ripens 10 to 15 days after Yellow Transp. Rated good for processing and good for pies.

APPLE — Continued

Red Melba — Similar to Melba but ripens a few days later, about August 15, and more red in color. Fruit medium to large, thin skin, striped crimson over waxy yellow undercolor. Rated fair to good for processing and for pies.

Red Transparent (Close) — Originated by U. S. Dept. of Agriculture, fruit is attractive, early, dull red, for home and commercial use. Usually 2½" or more in diameter, ripens slightly ahead of Yellow Transparent. Recommended for home and local market use.

Red Wealthy — A red sport of Wealthy, ripens first two weeks of September. Fruit medium to large and uniform in shape. Skin deep vivid red, thin, smooth and glossy. Flesh firm, crisp, subacid to tart. Rated very good for processing, and good as a pie apple.

Ruby — A new variety, cross of Ballia Beauty and Starking. Fruit is medium to large, uniform, smooth and quite firm. Skin moderately thick, washed and blushed deep red. Flesh firm, crisp, mildly subacid. Ready for harvest about Nov. 5-10. Keeps well in storage into April and May.

Spartan — A cross of McIntosh and Newtown. Fruit is above medium size, McIntosh in shape but more symmetrical and uniform. Skin is thin, with a solid, dark-red blush. Flesh is firm, crisp, juicy, slightly sweeter than McIntosh. Matures about two weeks after McIntosh. Grown under normal orchard conditions will store until January.

CHERRY

Sam — Black fruit which is as large as Bing and of good quality. Pollinates with Bing, Lambert and Van. Ripens 10 days earlier than Bing. Resists cracking 3½ weeks.

PEACH (For comparison purposes Elberta Peach generally ripens about September first.)

Dixie Gem — Ripens 4 weeks earlier than Elberta. Fruit medium size, yellow fleshed and is non-browning making it superior for canning and freezing. Very good for fresh fruit.

Dixie Red — Ripens 6 weeks earlier than Elberta. Fruit is highly colored, yellow fleshed variety of medium size. Expected to be very popular as an early ripening variety.

Jerseyland — Ripens 3½ weeks before Elberta. Earliest yellow fleshed freestone variety that stands up well under commercial handling. Fruit is large and firm and excellent for freezing.

Red Globe — Ripens 3½ weeks before Elberta. Large freestone of good shipping and keeping quality.

Red Haven — Ripens 4 weeks before Elberta. Well colored medium size fruit. Flesh is non-browning and considered excellent for canning and freezing. Classed as freestone but tend to cling in Oregon.

Southland — Ripens 2 weeks before Elberta. Medium size, freestone variety with firm, juicy, medium textured flesh that ships well.

Sun Haven — Ripens 4½ weeks before Elberta. Medium large semi-cling variety that handles unusually well for an early maturing variety.

Sun High — Ripens 2 weeks before Elberta. Large firm variety that is of highest quality for fresh, frozen and canned use. Flesh is fine textured.

Veteran — Ripens 1½ weeks before Elberta. Medium size, fairly coarse texture, firm, and of good quality.

NUT TREES

ALMOND

Ne plus Ultra, pollinizer.

Lightly branched and whips.

Nonpareil, thin shell.

2 to 3 feet, tip layers	6.50	60.00

WALNUT

Franquette Grafts.

Best commercial variety for Pacific Northwest.

	Per 10	Per 100
8 to 10 feet	\$32.50	\$300.00
6 to 8 feet	27.50	250.00
4 to 6 feet	22.50	200.00
3 to 4 feet	16.50	150.00

Franquette Seedlings.

The seedling tree produces well, but the nuts are smaller than from grafted trees.

Quality is similar.

Manregion Seedlings.

Very hardy. Large nut.

	Per 10	Per 100
6 to 8 feet	13.00	120.00
4 to 6 feet	11.00	100.00
3 to 4 feet	8.50	80.00
2 to 3 feet	7.50	70.00
18 to 24 inches	6.50	60.00

SMALL FRUITS

All prices subject to change without notice.

The 100 rate will apply only on orders calling for 50 or more of a variety and grade; less than 50 will take the 10 rate; 500 or more the 1000 rate where such a rate is shown and no 500 rate listed. Strawberry plants sold as listed.

BLUEBERRIES

Burlington, late	} 3 year	Per 10	Per 100
Concord, midseason, large			
Jersey, late, large			
Pemberton, midseason		\$7.50	\$ 70.00
Rancocas, midseason, large		5.50	50.00
Rubel, midseason			
Stanley, midseason	} 2 year		
Atlantic, midseason			
Berkeley, midseason, large		8.50	80.00
Dixie, late midseason		6.50	60.00
Weymouth, early			

Cross-pollination is necessary for Blueberries, and any two of these varieties will pollinate successfully. (50 or more of the combined varieties take the 100 rate.)

The 3 year plants which are bushy and well developed are recommended for salesyard purposes.

SHADE AND FLOWERING TREES—Continued

IMPERIAL LOCUST

(Plant Patent No. 1605)

A graceful spreading variety with symmetrically arranged branches forming a regular and compact tree. Foliage is dainty and refined, and leaflets are more closely spaced than the average Honeylocust forming a more dense cover. This tree grows straight without staking.

SKYLINE LOCUST

(Plant Patent No. 1619)

An unusual variety with distinctly pyramidal form. Branches are uniformly spaced, resulting in a well filled tree on a sturdy trunk which need not be staked or specially trimmed. Foliage is dark green and leaflets are larger and more closely spaced than the average Honeylocust.

2-year or more tops.	10-29	30-99	100-299	300 up

EVERGREENS

The 10 rate is allowed if 5 or more conifers of a variety and grade are ordered. Prices are increased for smaller quantities.

All prices subject to change without notice.

Our Evergreens are produced under most favorable conditions assuring a strong, fibrous root system, good shape and color. An adequate ball is used, but we are careful to keep the weight down to avoid excessive transportation charges.

Unless otherwise specified, Evergreen prices cover B&B stock.

CONIFERS

ARBORVITAE

Baker. T. or. bakeri.

An excellent compact pyramid. Bright green. Hardy.

BROAD-LEAVED EVERGREEN TREES and SHRUBS

The 10 rate is allowed if 5 or more broad-leaved evergreens of a variety and grade are ordered. Prices are increased for smaller quantities.

AZALEA

Azaleas will be available in a good selection of varieties and sizes and will be excellent quality. For convenience we are listing available varieties by Hybrid Groups. Where available, we list the Royal Horticultural Society Color Chart (HCC) or Robert Ridgeway Color Standard and Color Nomenclature (RCS) designation of color for purposes of accuracy. The practice of growing Azaleas in containers is becoming increasingly popular, and for those interested in the 4-6, 6-8 and 8-10 inch range of sizes the container-grown Azalea represents a very good value. Varieties available in gallon cans are indicated by an asterisk (*).

GABLE

Boudoir — Single, 1½", violet red with darker blotch (HCC 027/1). Early. Dense and broad.

Claret — Single, 1½", dark red. Midseason. Medium height.

Corsage — Single, 2½", lavender, fragrant. Late April. Tall.

Edna — Single, hose-in-hose, pink. Midseason. Tall.

Herbert — Single, hose-in-hose, frilled, 1¾", reddish violet with darker blotch. (HCC 31.) Early midseason. Tall, spreading.

La Roches — Single, magenta red. Very early. Low spreading.

***Lorna** — Similar to Rosebud but freer growth.

***Louise Gable** — Semi-double, 2¼", violet red with darker blotch. (HCC 0625.) Late. Low spreading.

Maryann — Double, dainty pink. Low growing.

Mary Dalton — Single, hose-in-hose, 1½", orange red (HCC 020/1). Early. Tall.

Mildred Mae — Single, reddish violet (HCC 31/3). Early. Low.

Miriam — Single, 1¾", violet red with darker blotch (HCC 25/1). Early midseason. Medium height.

Old Faithful — Single, 2¼", reddish violet with darker blotch (HCC 29/2). Early midseason. Medium height, spreading.

***Purple Splendor** — Single, hose-in-hose, purple red. Midseason. Medium height, spreading.

***Rosebud** — Double, hose-in-hose, 1¾", violet red (HCC 25/2). Midseason. Small bushy.

Royalty — Single, 1½", reddish violet with red blotch (HCC 31/2). Late. Medium height, spreading.

Springtime — Single, 2", violet red with darker blotch (HCC 25/1). Early midseason. Erect.

Susan — Single, salmon pink. Late, Low bushy.

GLENN DALE

Aphrodite — Single, 2", pale rose pink. Early midseason. Broad spreading.

Buccaneer — Single, 2", brilliant orange red. Midseason. Tall spreading.

Carmel — Single, 2", pinkish rose (HCC 0023). Midseason. Tall spreading.

***Carnival** — Single, 4", reddish orange (RCS Salmon). Early midseason. Upright.

Dayspring — Single, 2", white with red margins. Early. Tall spreading.

***Elizabeth** — Single, 3", orange red (RCS Begonia Rose) with heavy blotch. Late midseason. Spreading.

Fashion — Single, hose-in-hose, 2", orange red (RCS Begonia Rose) with red blotch. Early midseason. Tall upright.

***Gaiety** — Single, 3", red (RCS Rose Pink). Late midseason. Medium height. Spreading.

Glamour — Single, 2½", red (RCS Rose Red). Early midseason. Upright. Medium height.

Greeting — Single, frilled, 2", orange red (RCS Coral Rose). Early midseason. Upright medium height.

Jubilant — Single, 2", rich purplish red. Early midseason. Erect bushy.

Melanie — Single, hose-in-hose, 1½", rose pink. Early midseason. Upright bushy.

Remembrance — Single, violet rose with blotch of red dots. Early midseason. Spreading.

***Treasure** — Single, 4", white. Early midseason. Medium height. Spreading.

BROAD-LEAVED EVERGREEN TREES and SHRUBS—Continued

AZALEA—Continued

KAEMPFERI

- Anny — Orange-red (HCC 020/1). Midseason.
 *Betty — Single, 2", red (HCC 623/1). Midseason. Tall.
 Fedora — Single, 2", violet red (HCC 625). Midseason.
 *John Cairns — Single, 1½", orange-red (HCC 20). Midseason. Tall.
 *Othello — Single, 2", fire red (HCC 020/1). Early. Upright.

KURUME

- Benegiri — Single, 1¼", red (HCC 23/2). Early midseason. Medium size. Upright.
 *Coral Bells — Single, hose-in-hose, tubular, 1", red with darker veins (HCC 24/2). Early midseason. Low spreading.
 *Hinodegiri — Single, 1½", red (HCC 024). Early midseason. Spreading.
 Mauve Beauty — Single, hose-in-hose, 1¼", reddish violet (HCC 30/2). Compact.
 *Sherwood Orchid — Single, 2", reddish violet (HCC 31/1). Early midseason. Spreading.
 *Sherwood Red — Single, 1¾", orange red (HCC 820). Low spreading.

MISCELLANEOUS

- *Hexe (Sanders) — Single, hose-in-hose, 1¾", violet red (HCC 025). Late midseason. Low spreading.
 *Ledifolia Alba — Single white. Midseason. Large growing.
 *Macrantha — Double pink form. Late.
 *Macrantha — Light red form. Late.
 Maxwelli — Large red form. Midseason.
 Twenty Grand (Pericat) — Semi-double, 2", violet red (HCC 24/2). Early midseason. Spreading.

RHODODENDRONS

Letters and numbers preceding variety names indicate relative hardiness.

H-1 — Varieties hardy to -25° F. These varieties should be hardy in southern New York and southern New England.

H-2 — Hardy to -15° F. H-3 — Hardy to -5° F. These varieties should be fairly hardy in the southern part of Long Island, Cincinnati, Washington, around Philadelphia and St. Louis.

H-4 — Hardy to +5° F. H-5 — Hardy to +15° F. These varieties should be hardy during most winters in the Portland and Seattle areas. We consider all the Rhododendrons listed hardy in California with the exception of the northern inland portion of the State.

All ratings are subject to revision as more complete information is available.

TREE PEONIES

Yamato-Noens Strain.

Named varieties sold to color. White, Red, Purple,

Pink. Generally bloom second year.

2 year, field grown grafts	13.00	120.00
1 year, field grown grafts	8.00	75.00

PORTLAND ROSES

The roses we offer are all grown near Portland in good, sandy, loam soil, without irrigation, thus securing a particularly fine root system and firm, well-ripened wood. The stock is usually ready for shipment by December 1. A favorable growing season seems to indicate excellent quality for this year.
